Clan Fly Reel

BY APPOINTMENT TO HRH
 THE PRINCE OF WALES
 MANUFACTURER AND REPAIRER
 OF FISHING TACKLE

Clan Fly Reel

Clan reels are crafted one at a time, only the best materials available are used and all parts are salt water resistant. After use in salt water the reel should be washed in fresh water and always dry before storage.

The reel is made for a defined customer, registered with a production number which carries the original owners details for the lifetime warranty. This warranty does not cover damage caused by misuse or lack of maintenance.

The reels are made in three sizes for line capacity and weights to suite different lengths of rods.

No I: 3½ inch dia. Rods of 12 to 14 ft,
DT line # 8/9,
Spey line Long Belly # 8/10

No II: 4 inch dia. Rods of 14 to 17 ft,
DT line # 9/10,
Spey line Long Belly # 9/11

No III: 4¼ inch dia. Rods of 15 to 18 ft,
DT line # 10/12,
Spey line Long Belly # 10/12

The consumer has to decide whether the reel should be left or right hand wind when ordering. The reels are not changeable once made. There are two foot lengths, 60 or 70 mm, some reel-seats do not allow a long foot length. Spare spools are available on request.

The Clan reel drag system is very sophisticated and it permits complete faith in playing large salmon in all conditions.

Solid and simple.
A reel to match Clan rods, the most
outstanding spey casting tools.
Made for sustainability with an everlasting design.
